

Quiz - 2 (IBM Professional Readiness Program) Data Analytics

Email *

Paulpandiyankannan@gmail.com

Student Name *

Paul Pandiyan K

Student College Name *

Government College of Engineering Erode

Student Contact Number *

9786416650

Student Group *

Group -3

What are the different joins we can perform while data preparation? *

- ☐ Full-Outer Join
- ☐ Inner-Join
- ☐ Left-Outer Join
- ☒ All of the above

A useful chart for displaying multiple variables is the *

- ☐ stacked column and bar chart
- ☒ scatter chart matrix
- ☐ scatter chart
- ☐ two-dimensional graph

Which of the following is an advantage of cognos. *

- ☐ Planning
- ☐ Analysis
- ☐ Forecasting
- ☒ All of the above

What are the features of dashboard. *

- ☐ They communicate information quickly.
- ☐ They display information clearly and efficiently.
- ☐ They are easily customizable.
- ☒ All of the above

What is data visualization? *

- ☒ It is the graphical representation of information and data
- ☐ It is the numerical representation of information and data
- ☐ It is the character representation of information and data
- ☐ None of the above

Which relationship we cannot perform in cognos *

- ☐ One to one
- ☒ Many to many
- ☐ Many to one
- ☐ One to many

A ____ is a line that provides an approximation of the relationship between the variables *

- ☐ sparkline
- ☐ gridline
- ☒ trendline
- ☐ None of the above

Data visualization tools provide an accessible way to see and understandin *
data.

- ☐ trends
- ☐ outliers
- ☐ patterns
- ☒ All of the above

A data visualization tool that updates in real time and gives multiple outputs is called *

- ☒ a data dashboard
- ☐ a metrics table
- ☐ a data table
- ☐ None of the above

Which of the following cannot be interpreted through dashboard. *

- ☐ Data discovery and experimentation
- ☐ Identify the patterns
- ☐ Extracting the insights
- ☒ Highly specific presentation
